

Create and implement shared access signatures

Objectives:

At the end of this episode, I will be able to:

Understand what creating and implementing shared access signatures is and why it is important.

Explain the basic concepts associated with creating and implementing shared access signatures.

Identify the reasons why an organization needs to create and implement shared access signatures.

Define how to create and implement shared access signatures.

External Resources:

Grant limited access to Azure Storage resources using shared access signatures (SAS):
